

## IPC 144 SCP Quiz 1

Create a new file on matrix called **quiz1.txt** and answer the following questions in it:

Keep saving your file to make sure you don't lose anything in case of dropped connection.

- 1- Write a C statement; declare an integer variable called "age" and initialize it to 24;
- 2- Write a Statement to print Hello World and then go to next line.
- 3- Name the four integer types in C language.

After you are done, save the file and submit your **quiz1.txt** as follows:

**~fardad.soleimanloo/submit scpq1 <ENTER>**
